## **REASONS FOR ALLOWANCE**

4. The following is an Examiner's Statement of Reasons for Allowance:

Claims 1-16 and 18-20 are allowable over the prior art of record.

The examiner has found that the prior art of record does not teach or suggest or render obvious a method and system for a shared storage network system. Wherein the storage portion which is divided into sectors which in turn are divided into blocks, each block can be identified by a physical block address. However, on the level of the shared storage network system, each block of each storage server has a unique virtual block address within a single global block address space, so that an ID is associated to each storage block of the global system. Wherein a local to global address translation is performed to derive the (local) physical block address of a particular block from its (global) virtual block address. Furthermore a plurality of local area networks, wherein the plurality of storage servers and the at least one storage client are grouped into the plurality of local area networks interconnected to form a global network. Wherein the at least one storage client to have read and/or write access to at least one block of at least one of the storage portions associated to one of the local area networks which differs from the local area network of the storage client, and interconnecting the plurality of local area networks such that in case of a read or a write access of one of the at least one storage client to at least one of the blocks, the virtual block address of a block to which access is desired is translated into a physical block address to identify the physical block associated with the virtual block. Finally the shared storage network system can be adapted

such that the physical block address of each block comprises a non-deterministic physical block address to address the unique physical block mapping to a particular virtual block associated with a particular virtual block address, and a deterministic physical block address to address a unique physical block in the global network to determine the location of the associated physical block as set forth in the specification and recited in the independent claims.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
